Dear Colleagues!

On October 23, 2019, the seminar “Smart cities” will be held at the Moscow State University of Civil Engineering (National Research University). The seminar is organized in partnership with the German Centre for Research and Innovation (DWIH). The program of the seminar includes reports of key speakers and a round table on topical issues of digitalization of the economy and urban economy, development and implementation of “Smart city” technologies.

The seminar participants will discuss the experience and prospects of creating and effective use of urban cyber physical systems, including regulatory issues, the choice of technological platforms for digitalization of the economy, regional development with the use of modern and advanced information technologies. The seminar participants will talk about the experience in achieving the goals of the National program “Digital economy of the Russian Federation” and National projects “Housing and urban environment” and “Science”.

Among the participants – representatives of the academic community and industry of Russia and Germany, who will share their views on the development of technology “Smart city”.

The seminar will include an exhibition of solutions for the “Smart city”, implemented by Russian and foreign companies, as well as a demonstration of the complex “Smart campus” of the MGSU, implementing the concept of a digital University.

Please confirm your participation till 21 October 2019 via e-mail:
